Bainbridge Island, WA 98110

Dear Librarian:

The U.S. Environmental Protection Agency, Region 10 has completed its fourth Five-Year Review of the Wyckoff/Eagle Harbor Superfund site on Bainbridge Island. We are required to review Superfund cleanups at least every five years at sites where contaminants remain in place. EPA uses the review to ensure that cleanup actions are protecting people's health and the environment.

We used to send paper copies of our Five-Year Reviews to the local library or other information repository. However, as part of our green business practices, we no longer automatically send paper copies. Your patrons can view the Five-Year Review Report at <https://semspub.epa.gov/src/document/10/100068034>. The report is also posted on our project web site, <http://www.epa.gov/superfund/wyckoff-eagle-harbor>, along with site summary information and other technical reports.

Thank you so much for making this material available to your patrons for viewing. We appreciate your ongoing help to make this type of information accessible to the public.

If you would like a hard copy of the Five-Year Review or a CD containing the report, or if you have any questions about maintaining this information repository, please feel free to contact me. I can be reached at 206-553-0247, 800-424-4372, or sherbina.debra@epa.gov.

Sincerely,

A handwritten signature in cursive script that reads "Debra Sherbina".
